

Application No. 514: Letter stencil

Author: Reel Group, Invergordon, United Kingdom

Magnets fixate a gigantic stencil on a steel hull

Recently, our company had to put up new lettering on the oil rig "Galaxy II" in Invergordon. Our workers used a huge stencil that was held in place by your magnets. About 8 CSN-60 (www.supermagnete.fr/eng/CSN-60) countersunk pot magnets attached the stencil to the steel hull of the oil rig, which made it much easier for our workers to paint the letters.

The result is impressive: The writing is consistent, even and legible.

Your magnets are generally very useful for our industrial climbers - they enable them to do different work easier and more efficiently.

Articles used

8 x CSN-60: Countersunk pot magnet Ø 60 mm (www.supermagnete.fr/eng/CSN-60)

8 x ZTN-60: Pot magnet with cylindrical borehole (www.supermagnete.fr/eng/ZTN-60)
