

Application No. 609: Magic trick: Magnetic water

Author: Eric De Metsenaere, Maldegem, Belgium, eric.demetsenaere@skynet.be

This cup of water defies gravity!

Eric De Metsenaere is actually not a magician, but a passionate physics teacher at the VTI (Free Technical Institute) in Bruegge, Belgium.

His trick is a spectacular one. It is possible through the combination of three physical laws: magnetism, air pressure and surface tension - and probably a little magic.

The water is common tap water - there is nothing else in it.

Eric leaves it up to the audience to figure out how this trick works...
