

Application No. 629: Fastening curtain rods

Author: Alodia T., Madrid, Spain

Fastening curtain rods with magnets

Our project:

After glazing our terrace we wanted to hang up curtains. Unfortunately, we were advised that we could not drill holes for the curtain rods. Then we had the idea of using magnets for that purpose.

Implementation:

We attached the rod mountings with 2 strong block magnets (www.supermagnete.fr/eng/Q-46-30-10-N) each on the terrace siding. We used telescope bars as curtain rods that are 2 m long when fully extended, on which we hung up our 1,60 m to 1,80 m long linen curtains.

Note from the supermagnete team:

Project "Fastening blinds" (www.supermagnete.fr/eng/project303) could also be of interest to you.
