

Application No. 815: Wooden frame with magnetic closure

Author: nilema GmbH, Dortmund, Germany

Those who love postcards, will love this magnetic frame

Parallel to our exclusive learning system "Wechsel-Dich" (swap out) the idea of an interchangeable magnetic picture frame as a decorative item began to evolve.

Neither the concept nor the choice of materials are anything new. However, a focus on the essentials and precision workmanship ultimately result in a high-quality and special product.

Eight embedded magnets make the wooden frame easy to use and allow it to be opened free from wear. The contents can be changed in less than ten seconds.

And with a thickness of 2 cm, the magnetic picture frame is stable on all flat surfaces in both portrait and landscape format.

With a little bit of creativity, a desire for change and a feel for interior design, this magnetic frame can be transformed time and time again into a new focal point. Even 3D objects can be inserted without a problem, thanks to the glass-free design. To us, the uniqueness of the frame merited the protection as a registered design.

Sustainability is important to us. That is why we use wood from sustainably managed sources, manufacture in Germany and take care to use resource-saving packaging materials.

By the way, the wooden magnetic frame is available in two sizes, made of either beech or birch wood, on our website (www.nilema.de (www.nilema.de/kaufen/)) and on Etsy.

And finally, we would like to thank the team at supermagnete.ch. The support during the development of our products was always friendly, fast, helpful and competent. Many thanks!
