

Application No. 834: Booth for garden fair

Author: STEEL, aboutsteel.ch, Kempththal, Switzerland

Quick assembly and takedown thanks to strong magnets

"STEEL" oasis

We used super magnets for our booth at the garden fair "Giardina 2018" in Zurich. The assembly was easy and quick since we didn't have to use screws or complicated connectors. The result looked great and attracted many visitors to our "STEEL" booth.

We attached countersunk pot magnets \varnothing 25 mm (www.supermagnete.fr/eng/CSN-25) on the substructure that held STEEL plates in black sheet lock.

We use these strong magnets in many projects!

Before - after: Assembly (left) and completed booth (right)

Note from the supermagnete team: If you want to attach larger and heavier sheets, we have much stronger pot magnets in our assortment:

Articles used

CSN-25: neodymium pot magnet Ø 25 mm with countersunk hole (www.supermagnete.fr/eng/CSN-25)

ZTN-25: neodymium pot magnet Ø 25 mm with counterbore hole (www.supermagnete.fr/eng/ZTN-25)

Online since: 19/09/2018
